*Information Forum - Workshop  
January 30<sup>th</sup>, 2018*

**It's Our Nature *to Know***  
*Alberta Biodiversity Monitoring Institute*

**UNIVERSITY OF  
ALBERTA**

bioacoustic unit

# WildTrax

*Alberta Biodiversity – See, Hear, Know*

## *Background*

- Previously used snow tracking and Riverforks to monitor mammals and birds
- Switched to the use of ARUs and Remote Cameras in 2015
- **Pro:** near continuous data collection!

**A FEW GBs → TBs OF DATA**

# WildTrax

*Alberta Biodiversity – See, Hear, Know*

## **EXAMPLE: History of Bioacoustic Data Collection**

- Bioacoustic data collection using ARUs began with the EMCLA pilot project in 2012
- Started with 25 ARUs
- Deployed 302 individual locations
- Collected 5.3 terabytes of data

# WildTrax

*Alberta Biodiversity – See, Hear, Know*

## **EXAMPLE: History of Bioacoustic Data Collection**

- Bioacoustic data collection using ARUs began with the EMCLA pilot project in 2012
- Started with 25 ARUs
- Deployed 302 individual locations
- Collected 5.3 terabytes of data

## **NOW**

- Over 800 ARUs
- Over 13000 individual locations
- Over 55 Projects
- Accumulated over 200 TB of data
- 5.85 million recordings and counting

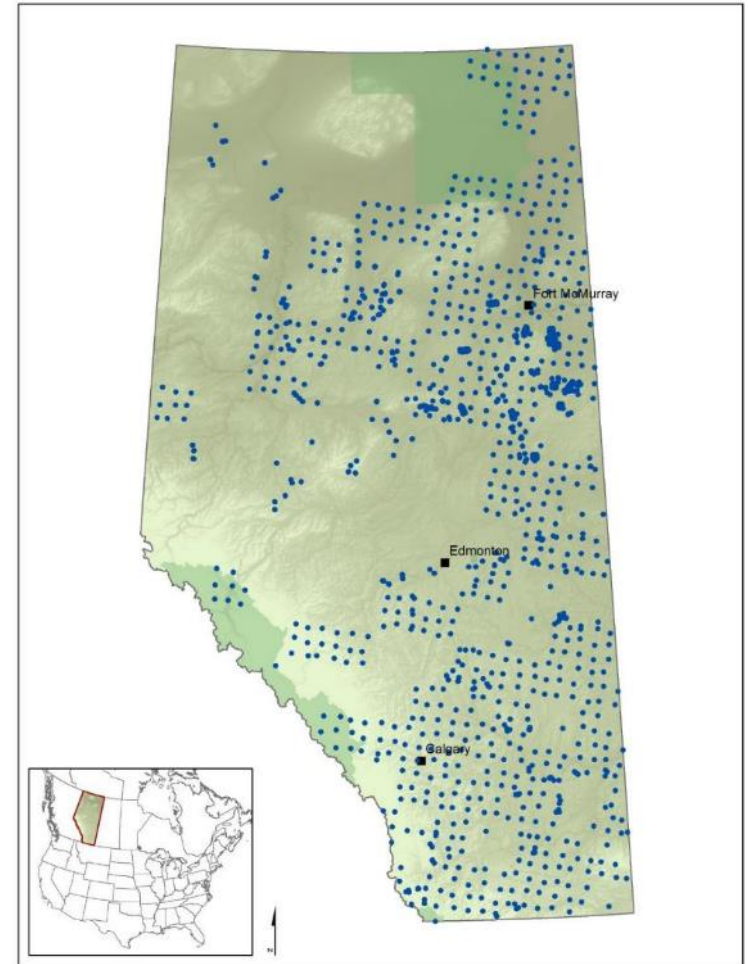

# WildTrax

*Alberta Biodiversity – See, Hear, Know*

## **EXAMPLE: Camera Data Collection**

- 9.5 million images from 2014-2018  
(collect about 2-3 million images per year)

# WildTrax

*Alberta Biodiversity – See, Hear, Know*

## *Background*

- Need for infrastructure to support these 'Big Data' data sets
- Support internal data storage and processing needs
- Create efficient processing platforms

It's Our Nature *to Know*

## *Alberta Biodiversity – See, Hear, Know*

### **Background**

- Need for infrastructure to support these 'Big Data' data sets
- Support internal data storage and processing needs
- Create efficient processing platforms
- Create best practices and protocols for cameras and ARUs

# WildTrax

## *Alberta Biodiversity – See, Hear, Know*

### *In a Nutshell*

- Is a web-based platform developed to establish a provincial environmental sensor data network
- Delivers multiple functions (currently for remote camera and ARU-based projects):
  - Project and user management
  - Data storage
  - Data processing and export
- Enables data sharing, transparency, and collaboration
- In Development: WildTrax Citizen Science to support crowd-based data tagging

# WildTrax

## *Alberta Biodiversity – See, Hear, Know*

### **Benefits to Users**

- Maximize data quality by reducing human errors
- Cost-savings through fast, efficient data processing; long term permanent storage
- Quick and easy data access and download
- Data contributes to bigger picture understanding of biodiversity change in AB
- Demonstrate leadership through a collaborative approach to collecting and interpreting data
- Engage citizens, communities, and partners in data collection
- Create and use the best available data to support environmental resource management

## *Feedback*

- Is this product/research something you would use? Would it add value to the work you do?
- How could we improve this product so that it meets your needs, if it doesn't already?
- Are we missing something here? Do you have information we don't that could make this product even better? How can we work together?
- What other research questions should we be thinking about in relation to this product?

*Alberta Biodiversity – See, Hear, Know*

## *Some Fun Numbers*

- 5.85 million recordings = play time of:
  - 175,500,000 minutes (@ 3 min/file)
  - 292,500 hours
  - 12187.5 days
  - 33.4 years
- Transcribed ~1%
- Automate recognition on almost 100%
